

Muhammad Marjan KK

Full Stack .NET Developer

✉ marjanmuhammad790@gmail.com 📞 +91 7902480917 📍 Kannur, Kerala, India 🌐 portfolio 🔗 LinkedIn 🐙 GitHub

Summary

Full Stack .NET Developer with hands-on experience building scalable and responsive applications using React.js and ASP.NET Core. Skilled in REST API development, JWT authentication, and database management using Entity Framework Core and SQL Server. Built full-stack applications with authentication, CRUD operations, and role-based access control. Experienced in performance optimization, clean architecture, and modern UI development using Tailwind CSS and Git-based Agile workflows.

Technical Skills

Backend C#, ASP.NET Core Web API, Entity Framework Core, LINQ, ADO.NET, SignalR, JWT Authentication, Role-Based Authorization, REST APIs, Clean Architecture	Frontend React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
Database Microsoft SQL Server, Database Design, Stored Procedures, Joins, Query Optimization	Tools & Practices Git, GitHub, Postman, Swagger UI, Visual Studio / VS Code, Chrome DevTools, Docker (Basic), Agile Methodology, CI/CD Basics, Azure (Basic), xUnit

Experience

Full Stack Developer Intern, Bridgeon Skillversity • Developed and maintained full-stack web applications using React.js and ASP.NET Core, ensuring scalable and responsive performance. • Built and integrated RESTful APIs to support dynamic frontend-backend communication. • Optimized SQL queries, improving database performance by 20% and enhancing application efficiency. • Implemented JWT-based authentication and authorization for secure user sessions and protected APIs. • Collaborated in an Agile development environment, contributing to feature development, bug fixes, and deployment of live projects. • Utilized Git and GitHub for version control, following branching strategies and participating in code reviews.	02/2025 – Present Malappuram, Kerala

Projects

SmartDesk Resource Management SaaS Application (Team Project), <i>Technologies: ASP.NET Core Web API, SQL Server, Entity Framework Core, Dapper, Hangfire, SignalR, React.js, JWT, Clean Architecture</i> • Developed a SaaS-based resource management system to register, allocate, and monitor company resources across multiple organizations. • Designed multi-tenant architecture supporting Super Admin, Company Admin, and Employee roles. • Implemented role-based access control and centralized validation for subscription-based access limits. • Built scalable APIs with structured responses and optimized resource management workflows. • Developed floor plan visualization with draggable resource placement and persistent layout storage. • Collaborated with team members in Agile environment, contributing to backend development and system architecture.
Full-Stack E-Commerce Web Application, <i>Technologies: React.js, JavaScript, Tailwind CSS, ASP.NET Core, Entity Framework Core, SQL Server, JWT Authentication, AutoMapper</i> • Developed a full-stack e-commerce platform delivering a scalable and user-friendly shopping experience. • Built a responsive frontend using React.js and Tailwind CSS for fast and intuitive UI performance. • Designed and implemented RESTful APIs using ASP.NET Core and Entity Framework Core for product, cart, and order management. • Implemented JWT-based authentication and role-based authorization to secure user sessions and APIs. • Optimized database queries and API responses to improve application performance and scalability.
Full-Stack Student Management System, <i>Technologies: React.js, JavaScript, ASP.NET Core, Entity Framework Core, SQL Server, JWT Authentication, Clean Architecture, Vercel, Render</i> • Developed a role-based student management system using React.js and ASP.NET Core with Clean Architecture. • Built a responsive and user-friendly frontend with modern UI/UX enhancements. • Designed and implemented RESTful APIs for student, course, and attendance management. • Implemented JWT-based authentication and role-based access control for secure user management (Admin, Mentor, Student). • Developed key features including attendance tracking, course management, leave requests, and real-time notifications. • Deployed the application using Vercel (frontend) and Render (backend) with cloud database integration.

Education

Bachelor of Arts in Economics, sir syed institute for technical studies	2020 – 2023 Taliparamba, Kerala
